Elardus Behrens
XRC

I did timekeeping for 20 odd years and also used the Enduro Clock system. After I stopped in 2010 I asked Elardus to do the timekeeping at our 2 yearly club rides. I cannot think of any ride that his systems ever failed to produce.

In 2012 we hosted a FEI ride with our ERASA ride, with all the different weight categories. Elardus and his system was very much part of a very successful ride. The club has never been exposed to any incidents or any rider impaired by him or his system used.

Elardus gives his full cooperation to the Organizing Committee and all officials at every ride. He is known as a perfect gentleman.

I think his XRC web page is brilliant with online entries and results. He has done excellent work to make it easy for a rider to enter for a ride, get results and information. The integration of the FEI horse and rider data base into his system will be a huge benefit to our sport in South Africa.

It's with great confidence that I will recommend Elardus and his system for any ride
