

User Guide – Registering for XRC

WWW.XRC.CO.ZA

- Until you have registered a logon, you will be able to view entries and results for rides, but not enter. In order to register, simply click on **Register**

- You will need to complete some fields. You can use your own member number or the member number of any of your team riders to register a logon. The logon is linked to an email address, and the same logon can be used for any number of riders. Once you have completed the relevant fields, click on **Register**. If you are not a member of ERASA, simply omit the member number field. Non-members can also use the system (in case of day riders and foreign riders)

- You will receive an email confirming your registration. Click on **link** which will take you to the webpage where you can log on to XRC with the email address and password you defined.
